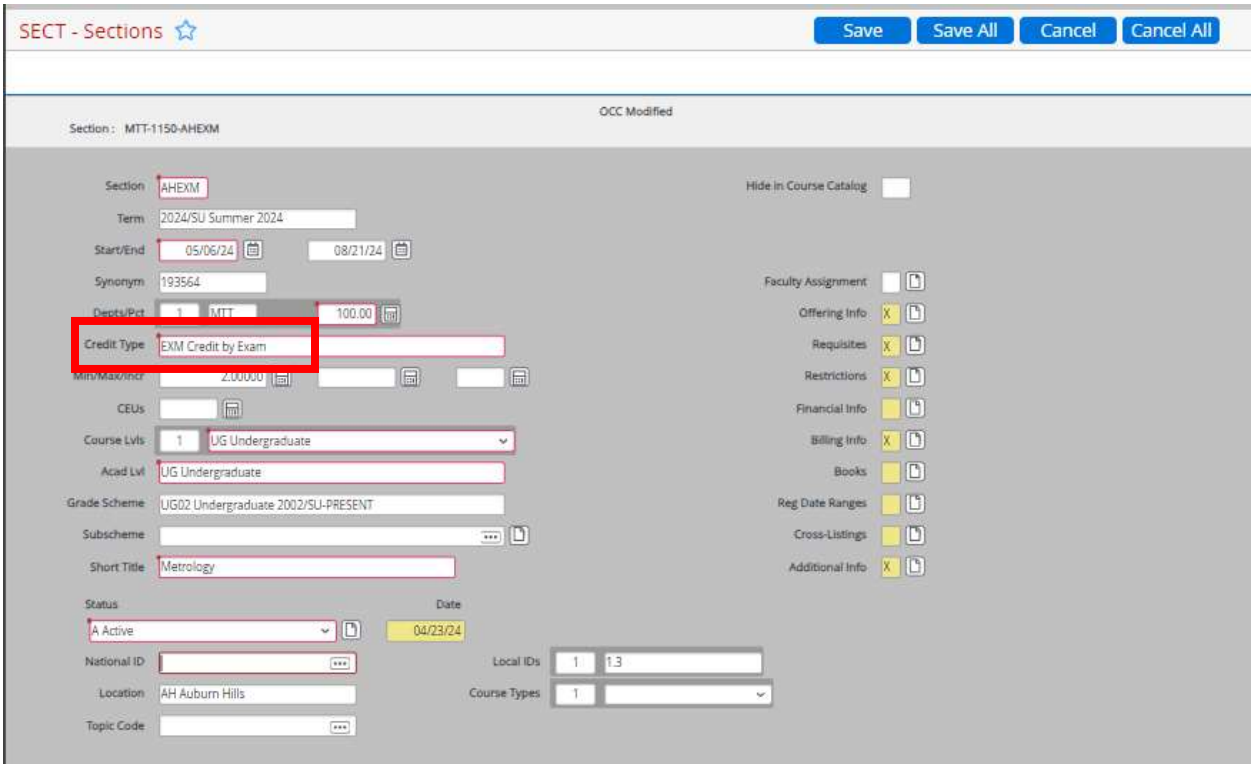
Credit for Prior Learning (CPL) – Course Section Setup

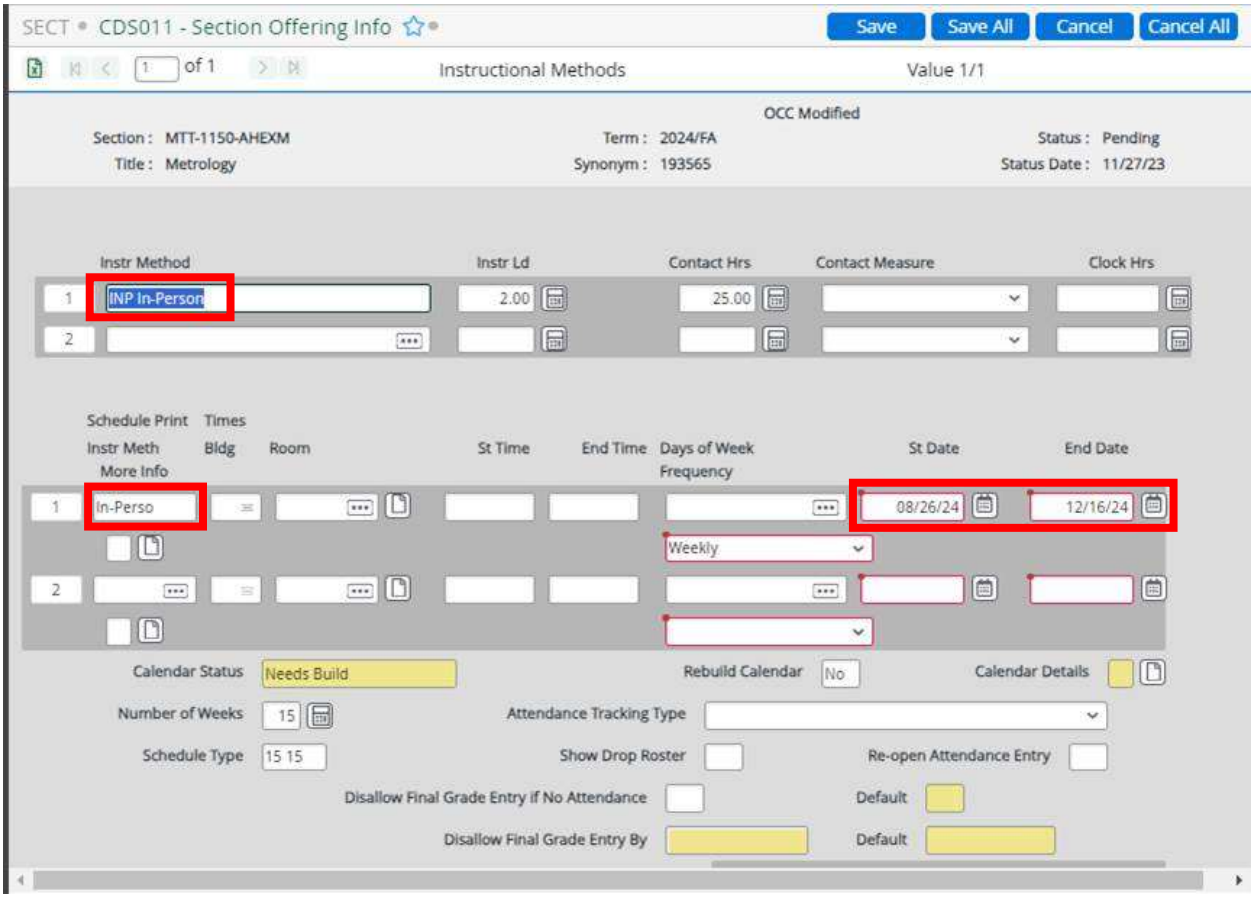
On April 1, 2024, OCC's Executive Council approved changing the Credit by Exam or Portfolio charge to a flat fee of $25 per course (nonrefundable). Also, OCC will waive this flat fee for internal applicants (non-credit to credit workforce program). This policy change helps to make credit by exam more accessible and affordable for students. The steps to create these course section details in Colleague are outlined below.

Step 1: Once it has been established with Dean that a student has requested/been approved to complete an exam or portfolio for credit for prior learning – a course section will be set up. The extension of "EXM" is added to the section location, as shown in the example screenshot below.

If the section is a pre-apprenticeship or apprenticeship credit by exam or portfolio, please see additional naming convention rules on page 5.

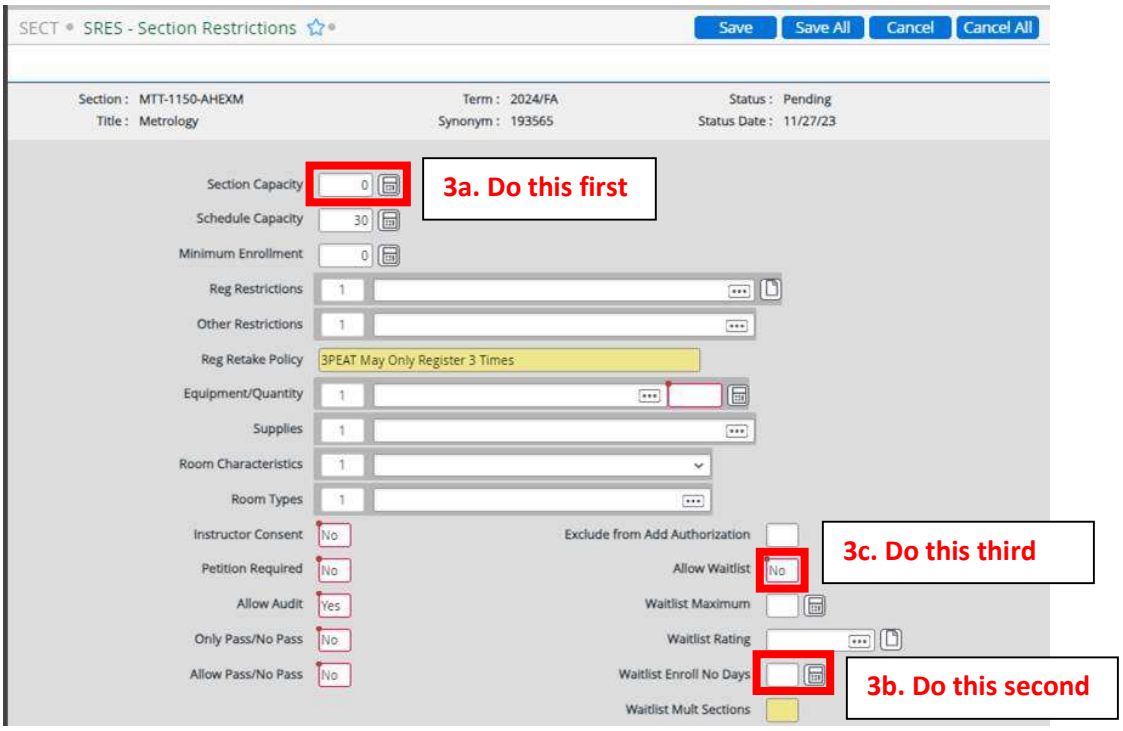


Step 2: Next, confirm that the instruction method and schedule print instruction method fields show as in-person, with the appropriate start and end dates. See fields marked in red below.



<u>Step 3</u>: Complete the following three actions **in order**

a. <u>First</u>, set section capacity to zero
b. <u>Second</u>, ensure the "waitlist enroll no days" field is blank
c. <u>Third</u>, change the "allow waitlist" field from yes to no



Step 4:

Fields that differ from the setup of a regular section include the following:

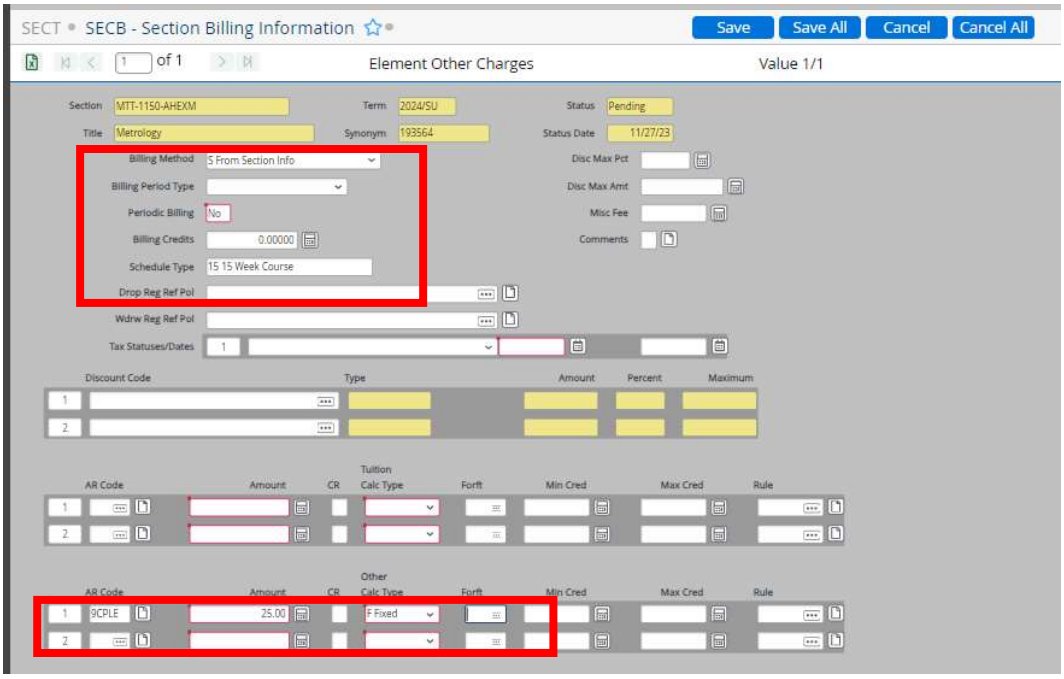
- **Credit type** = EXM (credit by Exam)

Under Billing Info:

- **Billing Method** = Section
- **Billing period type =** *leave this field blank*
- **Billing Credits** = 0.0000

Add under OTHER (bottom section)**:**

- AR code = 9CPLE
- Amount = $25.00 for credit students, $0.00 for non-credit to credit workforce program students
- Other Calc Type = F Fixed



Be sure to create the section as Section based billing so that the student is not charged any contact hours (tuition rate x billing credits/contact hours) and also so the student does not get processed through the regular billing tables and be charged the student support fee (if this is the only section being taken.) The assessed charge to the student is a flat $25 for credit students and $0.00 for non-credit to credit workforce program students (as of April 2024).

Note: Credit by exam or portfolio sections should follow the same grading process and deadlines as regular classes.

Naming Conventions for Pre-Apprenticeship and Apprenticeship Credit by Exam Sections

- Standard EMIT Sections (Frequently Used):
  These are sections where students are not billed (e.g., apprenticeship programs billed to another agency). Typically, these sections involve multiple students.

- Student Billing EMIT Sections (Possibly Needed):
  Sections where students are billed $25.

1. **Maintain the Standard Naming Convention:**
   Most credit by exam sections will continue using our existing format where the first two characters represent the campus and the last three characters are "EXM."

   Example:
   AHEXM – Auburn Hills – $25 payment setup (payable by the student).

2. **Introduce an Alternate Naming Convention for Non-Billing Sections:**
   For apprenticeship sections where students are not billed, the naming convention would use an "A" in the second character position to differentiate them.

   Example:
   AAEXM – Auburn Hills – No payment setup (payable by apprenticeship/other).

3. **Future Flexibility:**
   If additional sections of the same course are required in the same semester with unique billing, the second character in the naming convention can be further utilized to differentiate these sections.

This solution offers several advantages:

- Consistency for most administrative specialists.
- Clear differentiation by distinct SoftDocs forms for each naming convention (in development).
- Flexibility to accommodate future changes.
- Easy identification of Credit by Exam sections by the "EXM" suffix.
